INNOVATIVE SOLUTIONS FOR INTERIORS WITH A UNIQUE RANGE OF DISTINCTIVE VISUAL APPEARANCES

Illuminate Interior Spaces

Danpal® Interior solutions enable designers to explore new aesthetic possibilities, creating revolutionary spaces transformed by light.

Danpal® brightens a multitude of internal surfaces: walls, partitions and interior ceilings can become radiant sculptural elements to create a unique ambience. Use your creativity to maximize the visual potential of natural or artificial light with Danpal® Interior systems.

FREEDOM OF EXPRESSION AND CREATION

WALLS AND PARTITIONS

LIVE IN LIGHT WITH DANPAL®

Internal spaces can be brought to life with Danpal®. Its clean lines, colored panels and lighting effects bring a feeling of spaciousness and illuminance to any interior setting.

Danpalon® Multicell provides exceptional quality of light, a rich non-industrial visual appeal and delivers superior durability with good thermal insulation. The Multicell structure transmits an even diffusion of natural light, producing a rich appearance similar to clear or frosted glass. Featuring unique and innovative extrusion technology, Danpal® panels provide more cells than traditional polycarbonate sheets.

IDEAL COMBINATION OF TRANSLUCENCY AND STRENGTH

The reduced spacing between panel ribs provides superior light diffusion as well as increased panel strength.

With the Danpalon® system, architects can divide or decorate spaces that create a sense of both intimacy and openness, since the panels have a semitransparent appearance.

EXTERNAL FRAMING

Seosan Hori Neighborhood Facilities, Korea | Danpal® Interior Partitions System 10mm | Architect: Cornerstone Thing Chusa

CEILING

MAKE THE CEILING AN INTEGRAL PART OF THE DESIGN SPACE

Danpalon's interior ceilings add color and life to structures. They are the best option for covering large areas of ceiling or concrete surfaces. We provide a safer, more convenient solution

which does not require heavy construction. The clean, smooth ceiling surface can integrate lighting and is ideal for large building areas such as shopping centers.

LED

CREATE LIGHTING ELEMENTS FOR A UNIQUE LOOK

At Danpal®, we give you the artistic freedom to experiment with lighting in ever more inventive ways. You can choose to break up the light rays, blur light, show or hide the light structure, build a unified panel of light or a combination of lighting in multiple panels. Give a different

feel to a wall, create a unified look or add screen prints or shadows. Our extensive range of lighting options, textures and reflections offer architects a rich palette for creating unique spaces, increasing the depth and illumination of the user's experience.

ABOUT THE COMPANY

Innovative light architecture systems for building envelopes

Danpal® are creators of exceptional light-transmitting architectural systems for building envelopes, providing optimal solar and thermal comfort.

For 50 years, our innovative systems have helped architects to transform light (both natural and artificial) into a powerful and versatile tool, for architectural creations that are internally and externally radiant.

An industry visionary, Danpal® are originators of the Danpalon® translucent panel standing seam system - a light architecture solution used around the world in commercial, education, transport, health, sports and high-tech projects.

Today, the company offers complete systems - providing total solutions for the building envelope. Danpal® designs, manufactures and distributes an unmatched range of daylighting systems for all types of building requirements - from Façades, cladding, roofs, skylights, shading, to interior and outdoor applications.

Danpal® systems are built around innovative technologies, deep architectural know-how and the ever evolving needs of our clients. Operating in five continents, Danpal® inspires architectural creativity with its rainbow of light architecture solutions.

Danpalon® Interior and Decoration is an integral part of Danpal's range of systems - giving you a complete solution
